## MESSAGE FROM THE PRINCIPAL

Once a trimester starts, it is time for self-assessment. From a school perspective, a self-assessment may include things like, How am I doing? Are my study habits working? Am I paying enough attention to my teacher? Self-assessment is always done with the idea that there are things each of us can always do better.

At TEC we believe the following: All students are unique individuals with varied interests and abilities. All students can be successful learners based on their abilities. High expectations directly affect performance.

Start to realistically set goals. Every day is a gift, and we must use it wisely. Education is certainly worth the commitment of time, money, and effort.

Stephanie Galez was born in Miami, but her parents came from Peru. She is now enrolled in Digital Design, in Mr. Percy Ordonez's class. She says she always wanted to study graphic arts. Although she graduated with a Master's Degree in Marketing and a Bachelor's Degree in Advertising, she never had the opportunity to do photo shop or learn graphic design.

She started a small business, now with only one client, hopes it will grow, and likes to work for herself. She wants to do marketing, social media, and give clients an on-line presence including designing their media advertisements. She says the Digital Design class is great. She is definitely learning the creative things she wanted to know.

Her classmate Kamina Brandon, who moved from New York City to Miami, agrees. She has an on-line business in women's clothing and apparel called *Kute Clothes*. She wants to market her business online and gain the digital skills to create on-line content, create a web site, edit videos, including U2 videos. The course at TEC appealed to her more than at other schools because it covers different types of software. This is the first time Digital Design is being offered, and it is off to a successful start!
